BETTERHOOD.IN REVAMP · 3 NOVEMBER 2026

Homepage: *before and after*

Each page shows one section of the live homepage next to the new one, with what stayed identical and what changed. All copy, products, prices, images and links on the new page are pulled from the live homepage, not retyped.

13	2 → 0	61 → 0
sections compared	dead links	myshopify.com links

Contents: 1 Hero · 2 Product range · 3 Trust stats · 4 Shop by concern · 5 Co-created · 6 Use cases · 7 Clinically accountable · 8 Physios · 9 Categories · 10 Testimonials · 11 Decades + assessment · 12 Press · 13 Sticky CTA · then metadata/SEO changes, the technical SEO check, suggested content changes and the list of what was removed or left as-is.

Screenshots: desktop 1440px (sticky CTA at 390px phone width). Live site captured 2026-11-03.

01 Hero

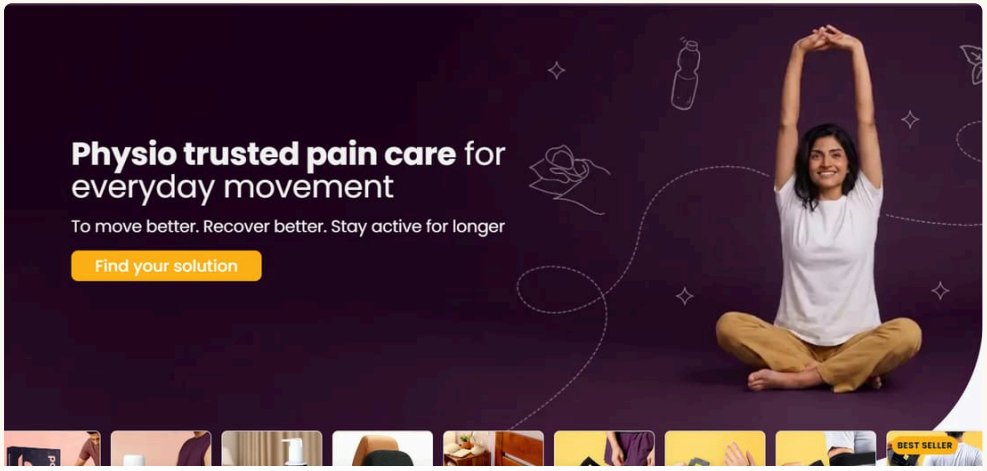

✓ Same as live

- H1 “Physio trusted pain care for everyday movement”
- Subline “To move better. Recover better. Stay active for longer”
- CTA “Find your solution” → shop.betterhood.in/collections/all
- Same banner photo (desktop) and the live mobile crop on phones

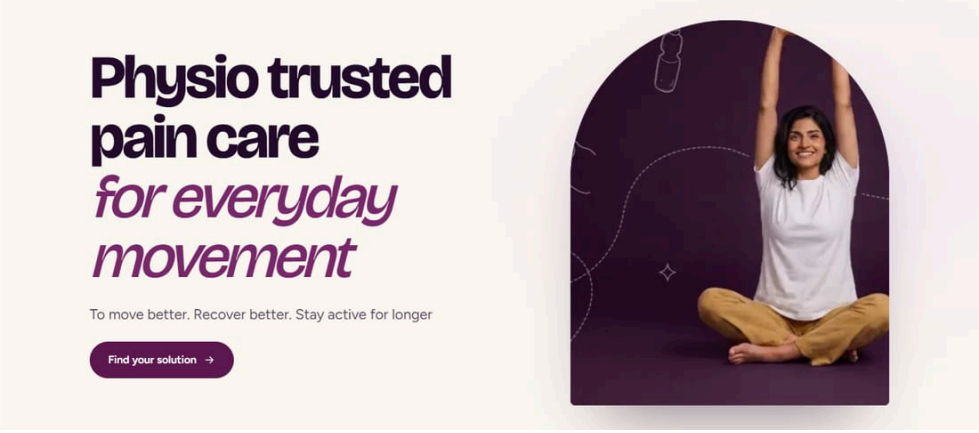

↻ Changed

- Photo now has alt text (was empty) and is preloaded as the LCP image
- Headline and photo paint on the first frame instead of waiting for JavaScript

Before betterhood.in (live)

After new homepage

02 Product range strip

✓ **Same as live**

- Same 10 products, same order, same product images
- “Best seller” badge on the LS Back Pain Belt
- “Shop now →” on every tile

↻ **Changed**

- Links go to shop.betterhood.in instead of betterhood-shop.myshopify.com
- Each tile has the product name as alt text

Before betterhood.in (live)

After new homepage

03 Trust stats

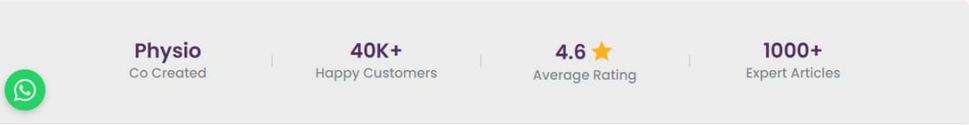

✓ **Same as live**

- Physio · Co Created
- 40K+ · Happy Customers
- 4.6★ · Average Rating
- 1000+ · Expert Articles

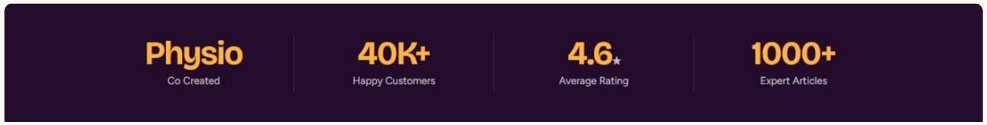

↻ **Changed**

Restyled only, no content changes.

Before betterhood.in (live)

After new homepage

04 Shop by concern

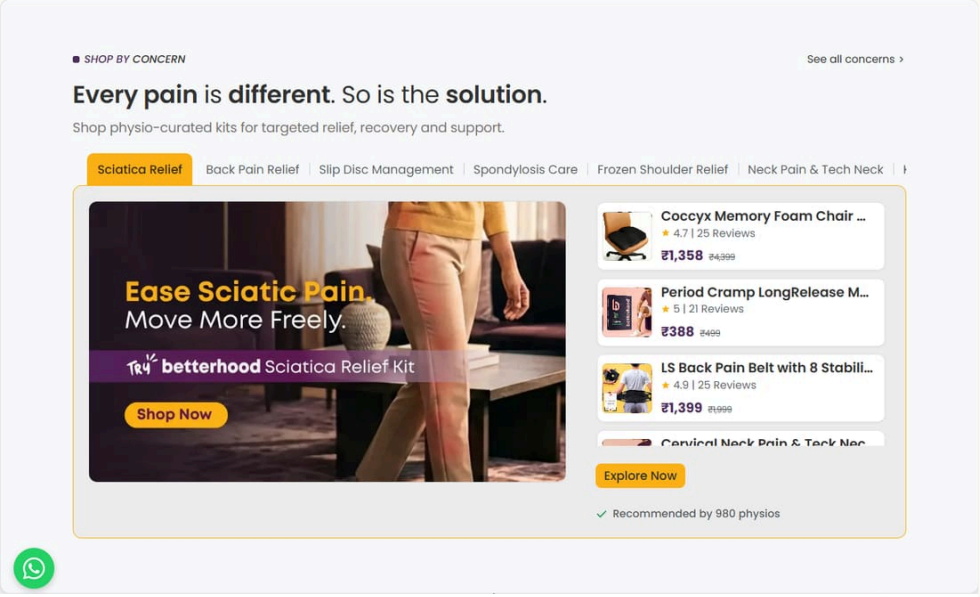

✓ Same as live

- “Shop by concern”, “See all concerns” → /collections/concerns
- H2 “Every pain is different. So is the solution.” and subline
- All 9 concern tabs, each with the same banner image and collection link
- All 31 product cards: name, rating, review count, price and MRP
- “Explore Now” and “Recommended by 980 physios” on every tab

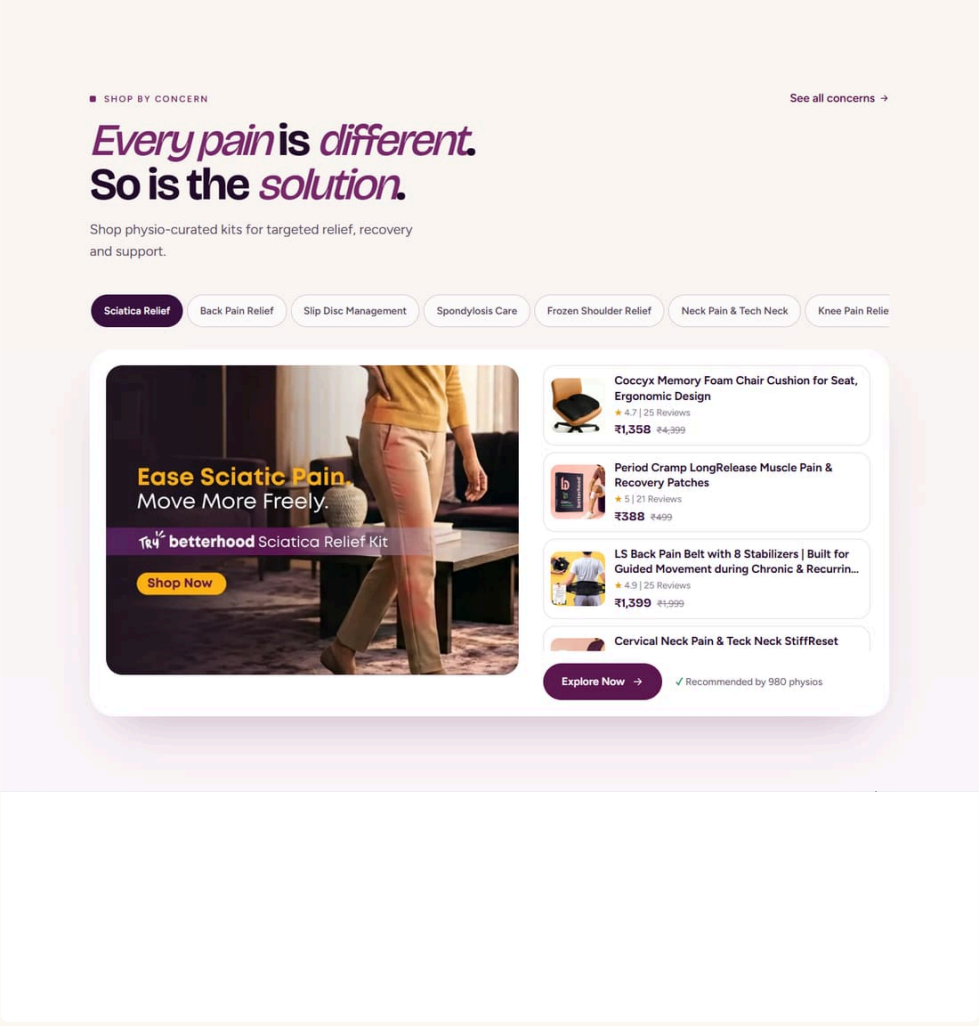

↻ Changed

- All 9 panels are in the HTML (hidden until picked), so every product and collection is crawlable
- Product links moved to shop.betterhood.in; banners have alt text
- Tabs support keyboard arrows

Before betterhood.in (live)

After new homepage

05 Co-created with physiotherapists

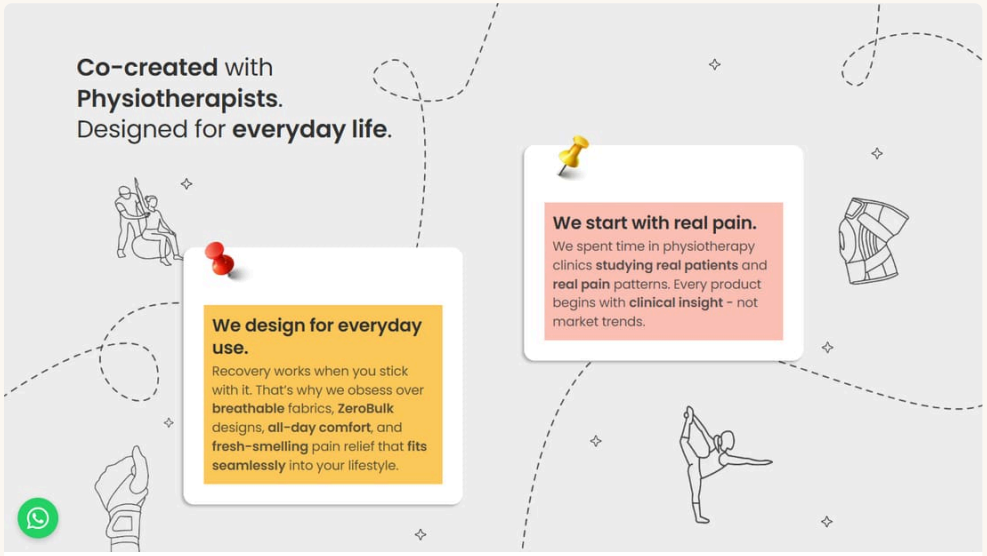

✓ Same as live

- H2 “Co-created with Physiotherapists. Designed for everyday life.”
- Both pinned cards with the same text and bold words
- Same doodle background, pins and 4 line drawings (now drift on scroll)

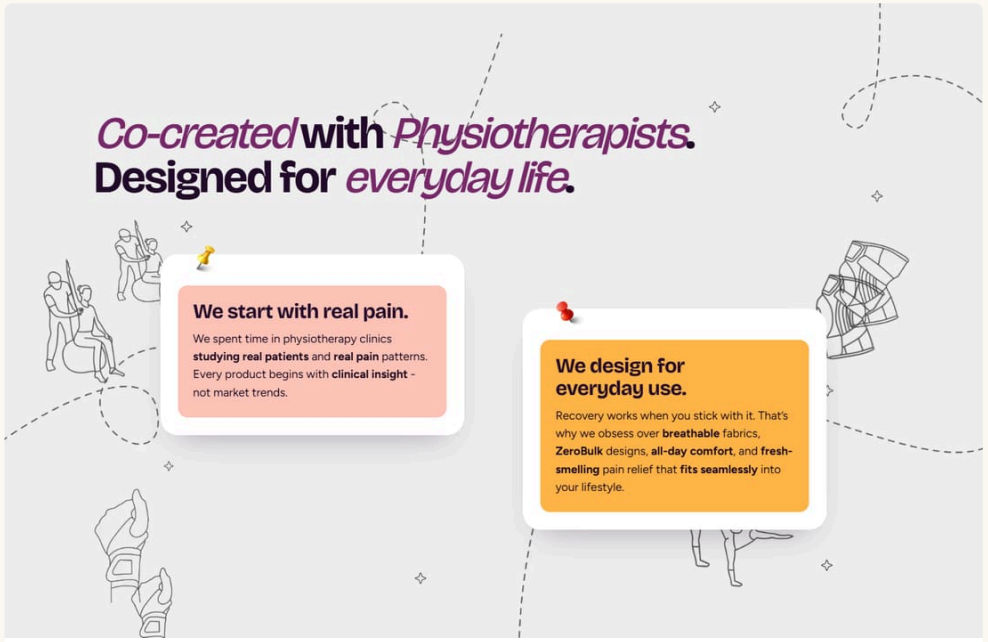

↻ Changed

Restyled only, no content changes.

Before betterhood.in (live)

After new homepage

06 Shop by use case

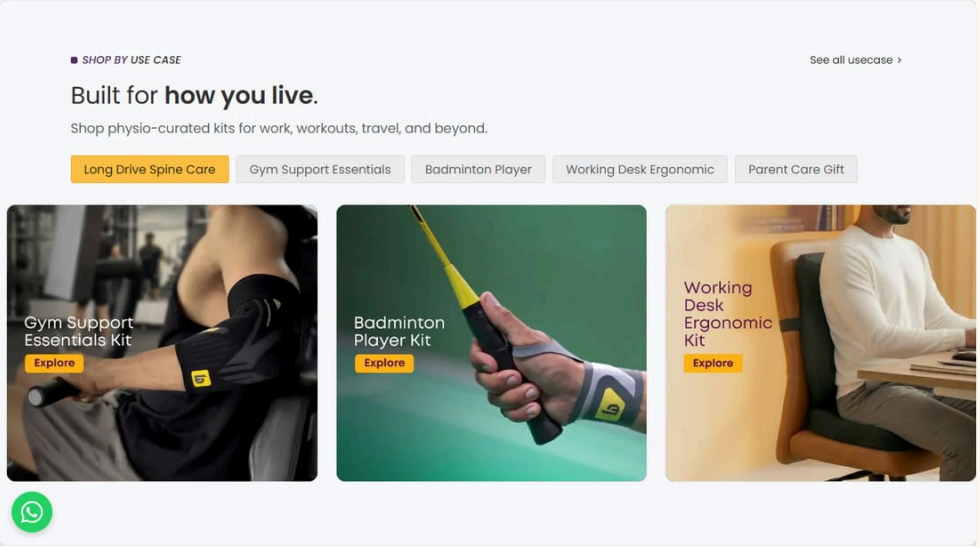

✓ Same as live

- “SHOP BY USE CASE”, “See all usecase” → /collections/use-case
- H2 “Built for how you live.” and subline
- 5 use cases with the same images and links

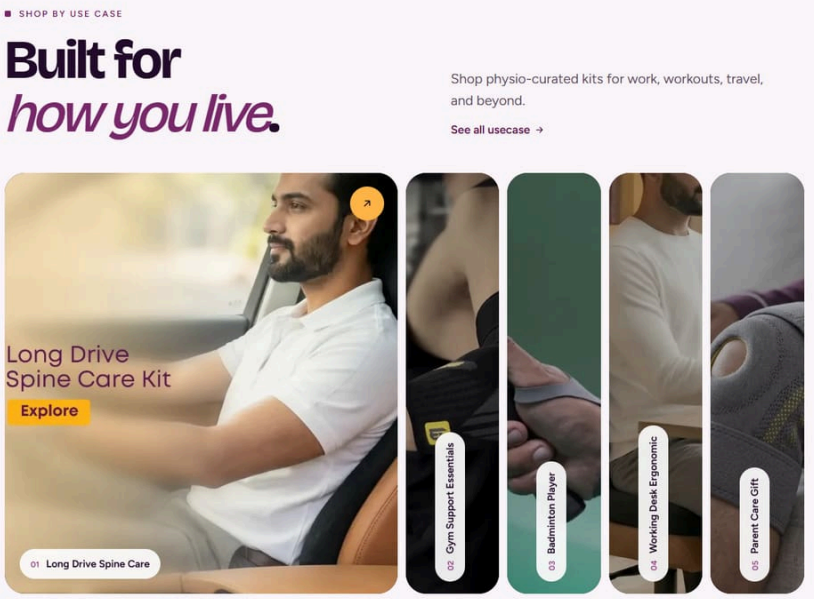

↻ Changed

- Images have alt text

Before betterhood.in (live)

After new homepage

07 Clinically accountable

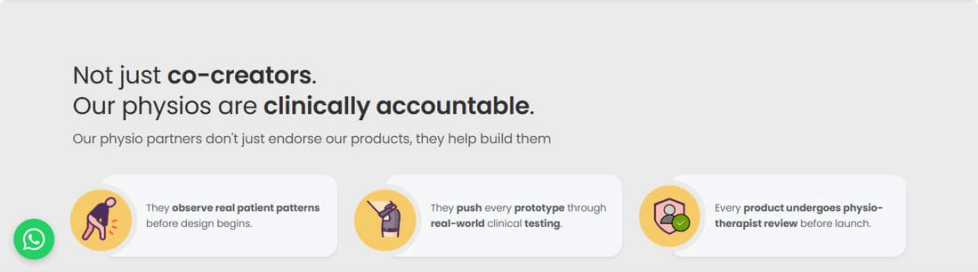

✓ Same as live

- H2 “Not just co-creators. Our physios are clinically accountable.”
- Subline “…they help build them”
- The 3 steps with the same icons and wording

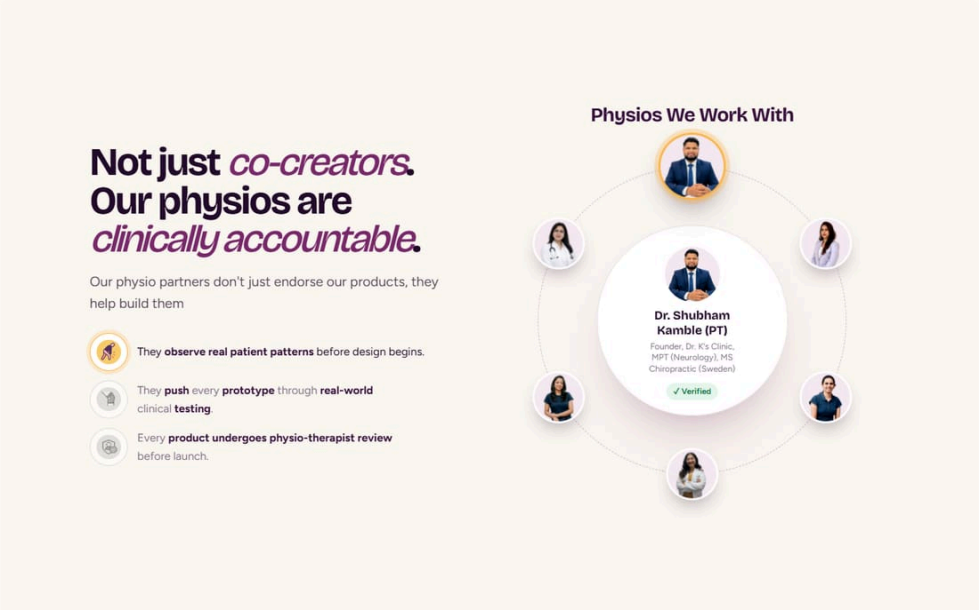

↻ Changed

- Steps light up one by one as you scroll

Before betterhood.in (live)

After new homepage

08 Physios we work with

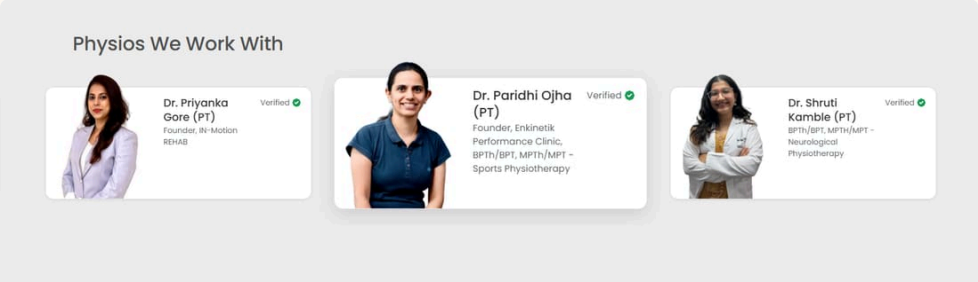

✓ Same as live

- H2 “Physios We Work With”
- All 6 physios with the same photos, names and credentials
- “Verified” badge

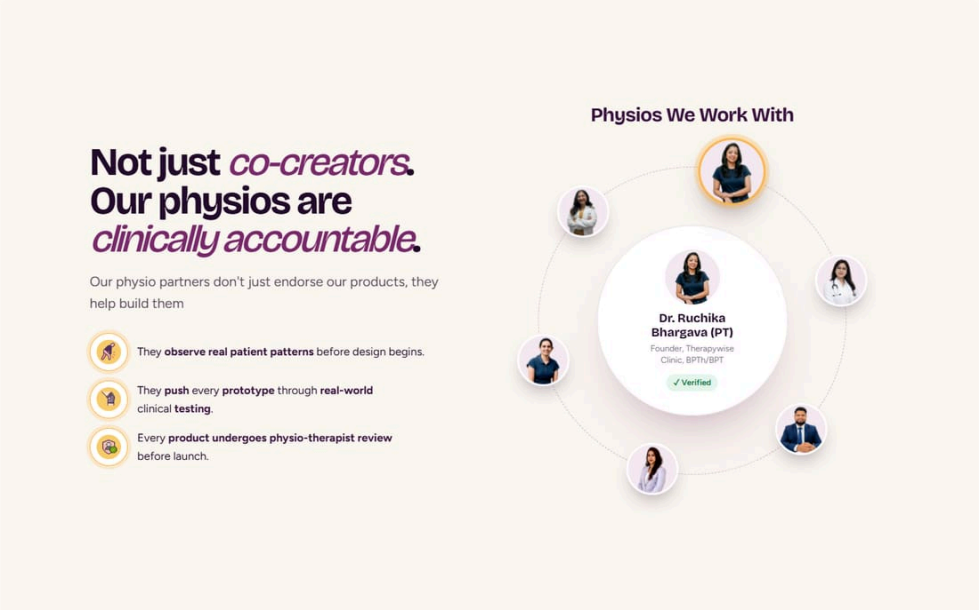

↻ Changed

- Dropped the empty quote marks under each physio (the live cards show a blank “ ”)
- Names and credentials of all 6 are also in the HTML as a list

Before betterhood.in (live)

After new homepage

09 One place. Everything your pain needs.

✓ Same as live

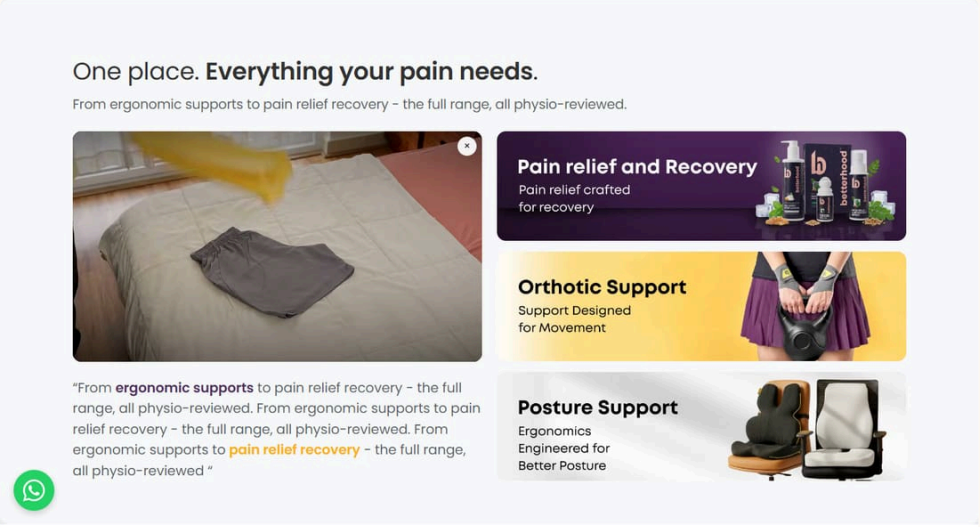

- H2 and subline
- Same video (y5MJ4hXNHgw), loaded only when played
- 3 category banners (desktop and mobile art) with the same links

↻ Changed

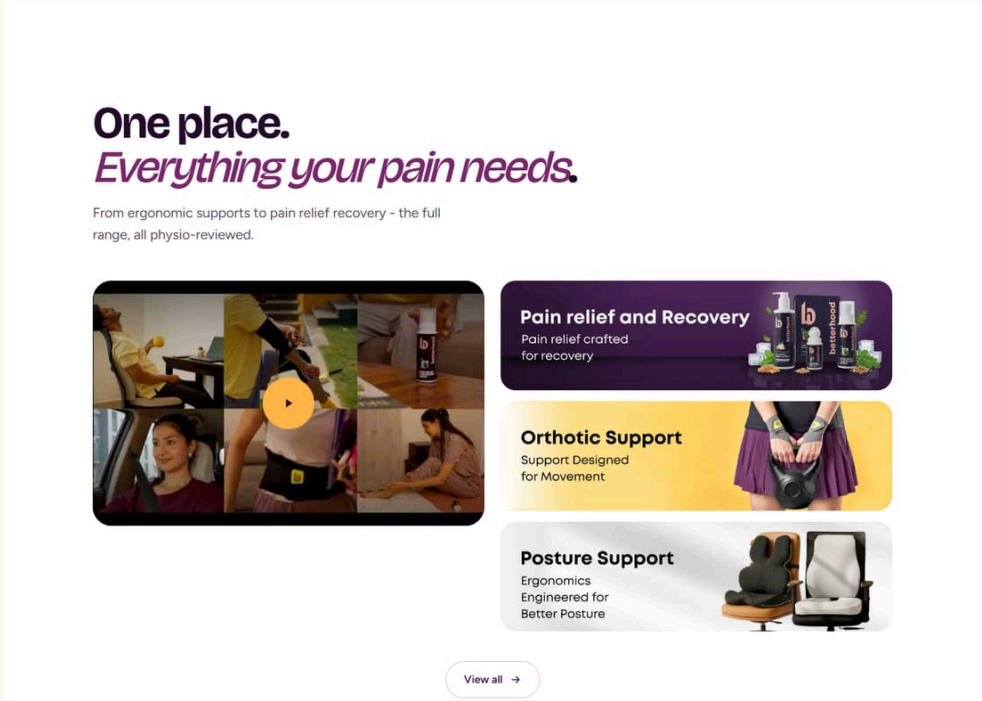

- “View all” was a dead link (#); it now goes to /collections/all
- Banners have alt text matching the words printed on them

Your call: Left out: the note under the video. On the live site it repeats the subtitle three times (placeholder copy). Say the word if you want it back.

Before betterhood.in (live)

After new homepage

10 Don’t just take our word for it

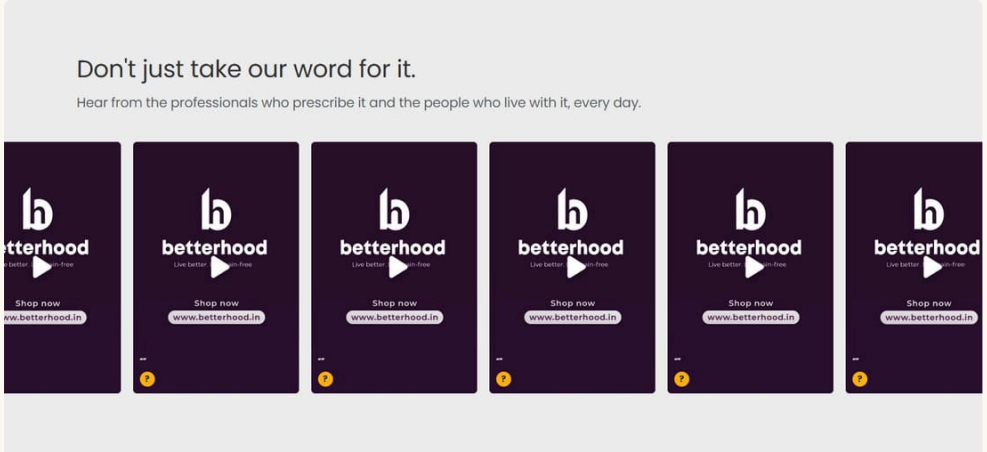

✓ **Same as live**

- H2 and subline
- All 11 testimonial videos, same order, tags (Wrist, Ankle, Roll-on, LS Belt, Car) and durations

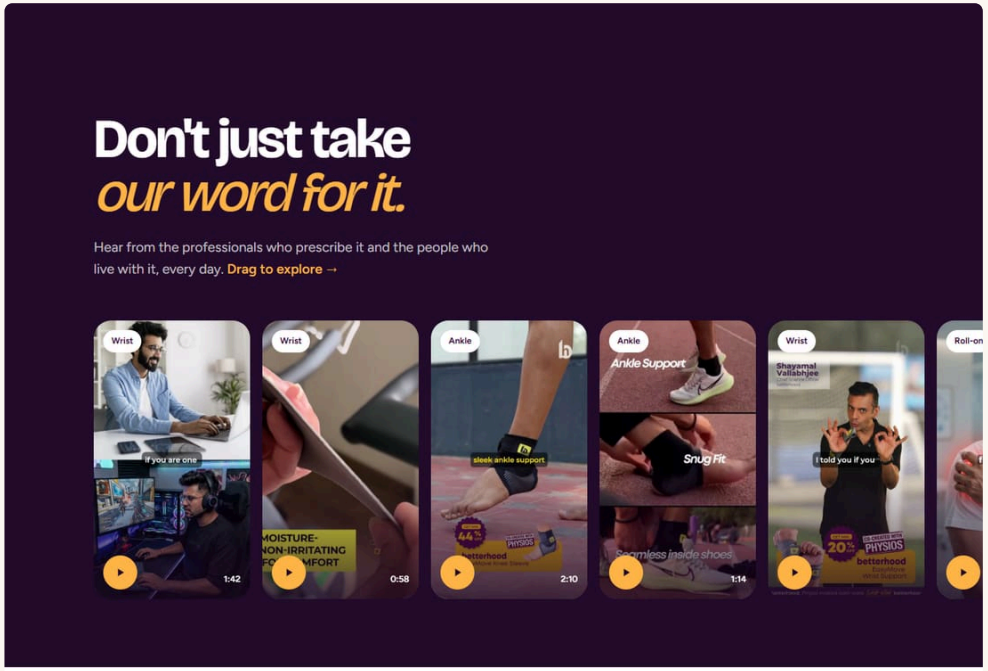

↻ **Changed**

- Real video thumbnails instead of the one generic placeholder
- Dropped the empty caption, blank quote and “?” avatar on each reel

Before betterhood.in (live)

After new homepage

11 Most people wait too long + Catch the signs early

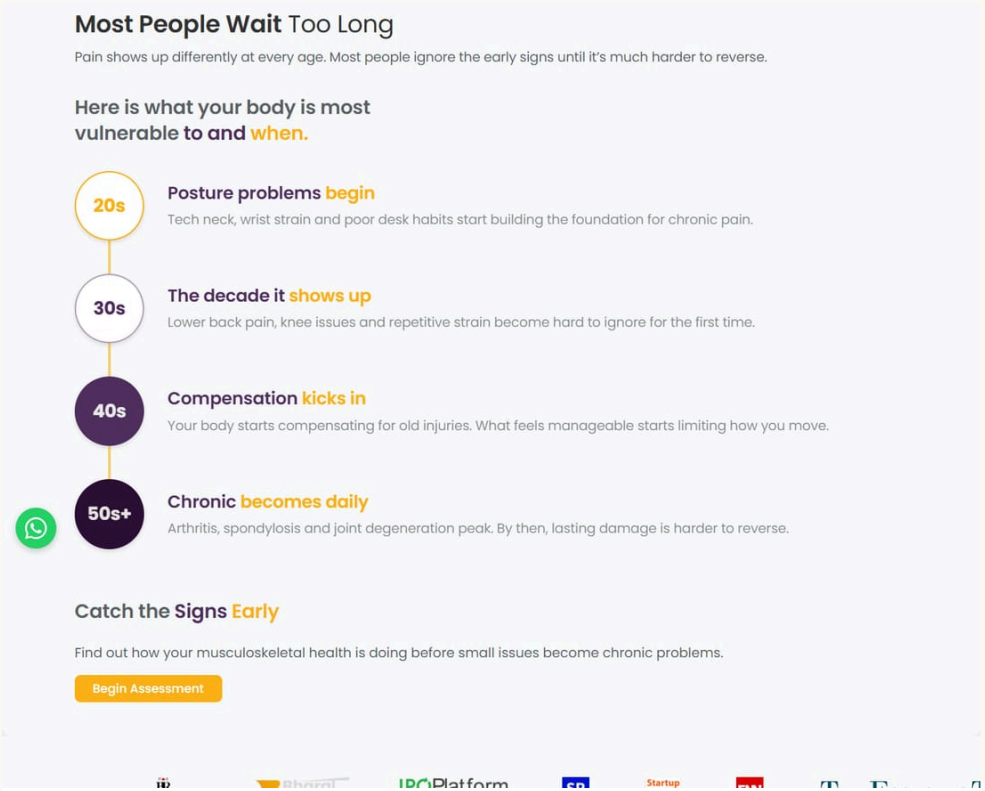

✓ **Same as live**

- H2 “Most People Wait Too Long”, subline and “Here is what your body is most vulnerable to and when.”
- 20s / 30s / 40s / 50s+ with the same titles and text
- “Catch the Signs Early”, its text and the “Begin Assessment” button

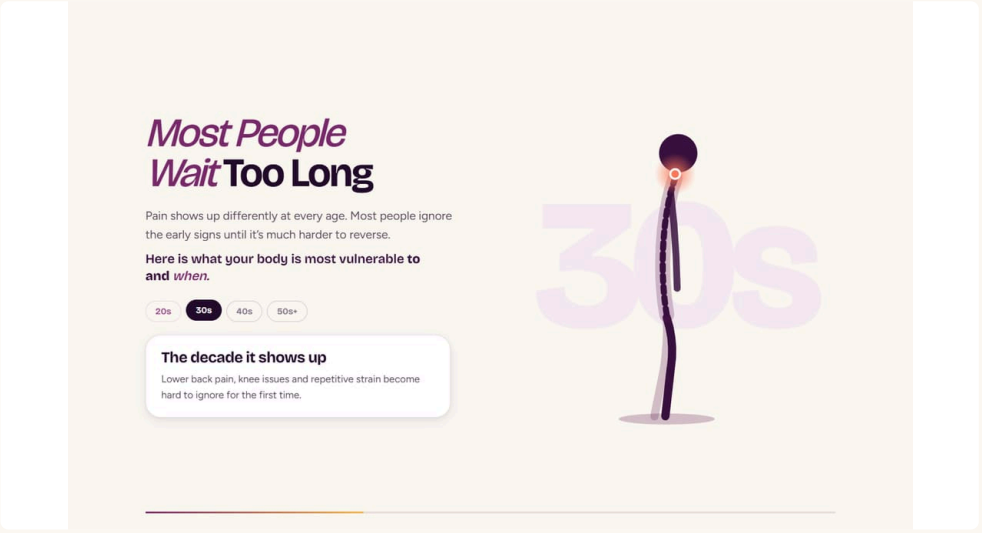

↻ **Changed**

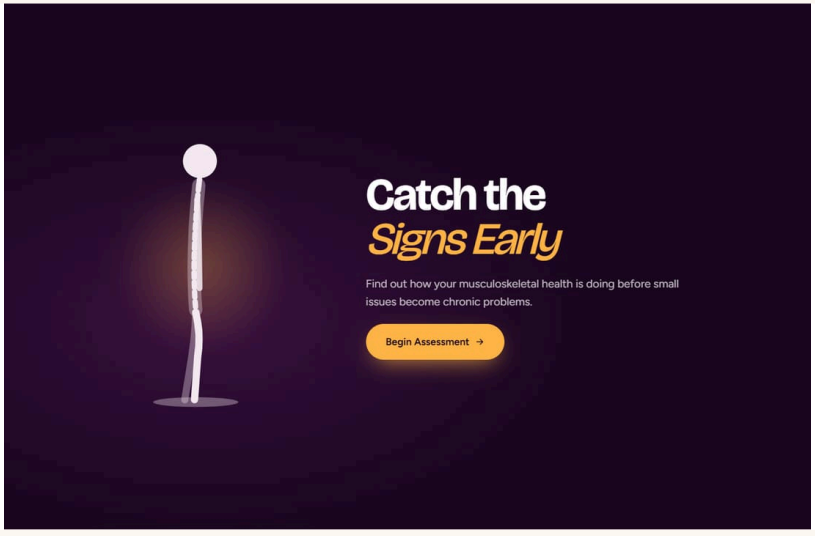

- “Begin Assessment” was a dead link (#); it now opens /quiz-landing-page/
- The four decades play out on scroll; all four are also in the HTML for search engines

Before betterhood.in (live)

After new homepage

12 Featured in (press)

✓ **Same as live**

- All 19 press logos with the same links, opening in a new tab

↻ **Changed**

- Every logo has the outlet's name as alt text (17 had none)

Before betterhood.in (live)

After new homepage

13 Sticky “Get Free Assessment →” (phones and tablets)

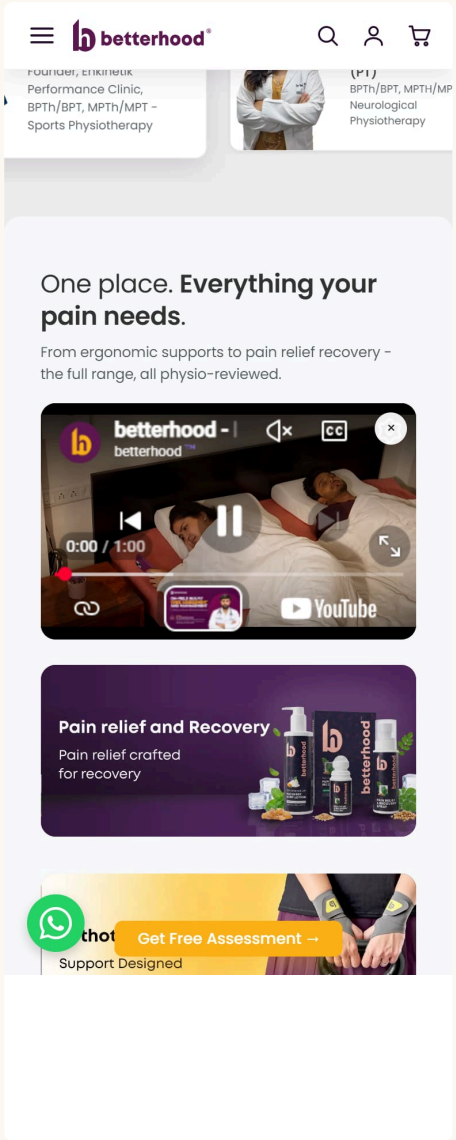

✓ **Same as live**

- Same label, same link (/quiz-landing-page/)
- Shown below 981px only, as on the live site

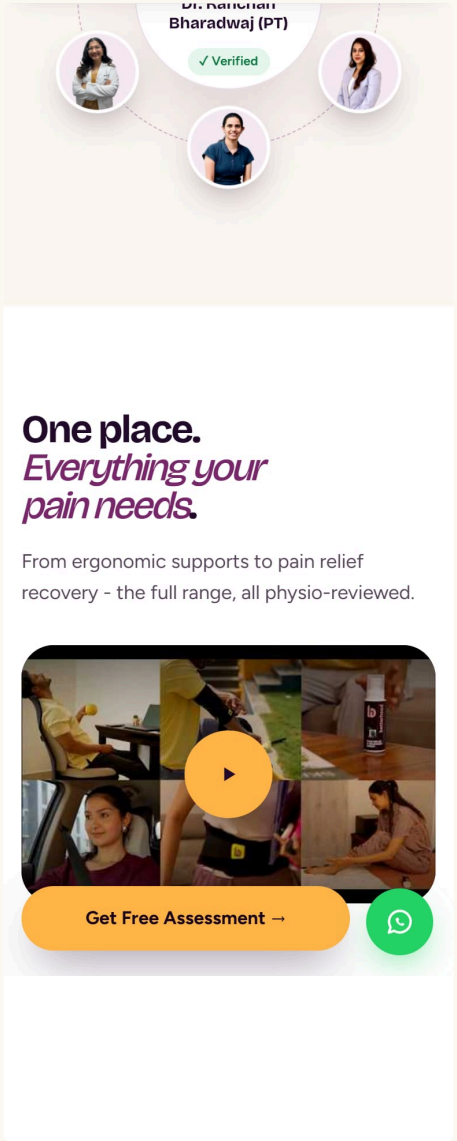

↻ **Changed**

- Hides while the hero, the assessment section or the footer is on screen

Before betterhood.in (live)

After new homepage

SEO Metadata and technical SEO

Item	Before (live)	After (new)
Title tag	betterhood India – Live better. Live pain-free (no keywords)	Physio Trusted Pain Care for Everyday Movement | betterhood (59 chars)
Meta description	Generic “innovative self-care tools…” (136 chars)	Back, neck, knee, shoulder pain + 40K+ customers, 4.6★, free assessment (148 chars)
Share image (og / twitter)	Logo mark on a white 1920×1080 card	1200×630 card with hero photo and headline, plus width, height and alt
Twitter / X tags	Card type only	Title, description, image and image alt
Language / locale	lang en-US, og:locale en_US	lang en-IN, og:locale en_IN
Robots	index, follow, max-image-preview:large…	Same directives (kept)
Search Console verification	Meta tag present	Kept (it was missing from the earlier revamp draft)
Mobile zoom	Disabled (maximum-scale=1, user-scalable=0)	Allowed (accessibility)
Structured data	Organization logo URL returns 404; SearchAction points at WordPress ?s= (won’t exist after the move)	Organization (512px PNG logo, address, contact point), WebSite and WebPage linked by @id
Product links	61 links to betterhood-shop.myshopify.com	All on shop.betterhood.in
Dead links	2 (“View all”, “Begin Assessment”)	0
Image alt text	64 of 70 images empty, plus 142 CSS background images that can’t carry alt	Every content image has alt text; decorative ones are marked decorative
Layout shift	Background images with no dimensions	width/height on all 136 images
LCP	Hero <img> loads eagerly with fetchpriority=high (fine)	Kept, plus a preload per breakpoint; headline and photo don’t wait for JavaScript
Crawlable content	Tab panels in HTML; product, use-case and category images are CSS backgrounds (invisible to image search)	Tab panels, all decades and all physios in HTML; headings read with proper spaces
Icons	WordPress site icon	SVG favicon + 192px PNG + Apple touch icon

SEO Technical SEO check of the built homepage

Checked on the built page (dist/index.html), not from memory.

Check	Result
Title	✓ 59 characters, keyword first, brand last
Meta description	✓ 148 characters
Canonical	✓ https://betterhood.in/
Robots meta	✓ index, follow, max-image-preview:large, max-snippet:-1, max-video-preview:-1
Language	✓ lang=en-IN
Search Console	✓ google-site-verification tag present (same code as live)
Open Graph / Twitter	✓ title, description, url, type, 1200×630 image with width, height and alt; large image card
Structured data	✓ Organization, WebSite, WebPage: all 3 blocks parse as valid JSON-LD
Headings	✓ Exactly one H1
Images	✓ 136 of 136 have alt (decorative ones empty on purpose) and 136 of 136 have width/height
Loading	✓ 3 hero preloads (one per breakpoint), preconnect to cdn.shopify.com
Icons	✓ SVG favicon, 192px and 512px PNG, Apple touch icon
Links	✓ 0 dead # links, 0 myshopify.com links
robots.txt	✓ Allows the site, blocks /result-* and /completed-message, points to the sitemap
Sitemap	✓ sitemap-index.xml with 3,679 URLs, homepage included

Fixed in this pass

- Five decorative images in the “co-created with physiotherapists” section had no width/height. They now have their real dimensions, so every image on the page is sized.

Can only be checked once the site is live

- Rich Results Test on https://betterhood.in/ (confirms Google reads the structured data)
- PageSpeed Insights, mobile and desktop (real LCP / CLS / INP numbers)
- Submit sitemap-index.xml in Search Console and watch Pages → Indexing for a few weeks
- URL Inspection on the homepage to see the page as Googlebot renders it

Content changes worth making (not done yet)

The new page keeps the live copy as it is. These are suggestions; none have been applied.

Change	Why / what	Impact
Fix the typos at source	“Teck Neck” and “Repititive” in Shopify product titles; “physio-therapist” in clinically-accountable step 3; “See all usecase” → “See all use cases”.	**High**
Link to Learn and the physio directory from the page body	The homepage body has no links to /learn/ or /physio-directory/; only the header and footer do. For example, a “Read more” per concern, or under the decades section.	**High**
Give the physios real quotes	All 6 cards had an empty quote on the live site. One line each on why they back betterhood adds trust and unique text.	**High**
Link physios to their profiles	5 of the 6 already have a /physio/ page on the new site (not Dr. Kanchan Bharadwaj). Linking passes authority and lets visitors check credentials.	**Medium**
Back up “Recommended by 980 physios”	The same number shows on all 9 concern tabs. Use a real per-concern figure, or say what it counts.	**Medium**
Make the trust stats checkable	Link 4.6★ to the reviews it comes from, and “1000+ Expert Articles” to /learn/. “Physio · Co Created” is the only stat that isn’t a number.	**Medium**
Write the note under the video	The live note is placeholder copy (the subtitle three times). Write one or two real sentences about what the video shows.	**Medium**
Add captions to the testimonial reels	Each reel has a tag and duration but no name, city or quote. A one-line pull quote per reel gives search engines and skimmers something to read.	**Medium**
Add a short FAQ	4–6 real questions (which belt for my back, how to pick a size, returns, is the assessment free). More indexable text on a page with about 1,100 words. Google now rarely shows FAQ rich results, so do it for the content, not the snippet.	**Medium**
Tighten the hero subline	“To move better. Recover better. Stay active for longer” reads as a fragment. Naming the main pains (back, neck, knee, shoulder) helps visitors and search.	**Low**
Make heading case consistent	Most headings are sentence case, but “Physios We Work With”, “Most People Wait Too Long” and “Catch the Signs Early” are Title Case.	**Low**
Cite the decades section	The 20s–50s+ lines are health claims; a physio name or source per decade makes them more credible.	**Low**

Removed, and left as on the live site

Removed from the earlier revamp draft (not on the live homepage)

- Founders' quote ("Why do we age?…"), the life-timeline "gap" chapter and the founders' sign-off: these come from the About page, not the homepage
- "IAP certified" in the hero and the "Co-created with physiotherapists" tag on the photo
- The body map with its invented one-line descriptions, plus "5-min assessment" and "Read expert articles" links per concern
- The bestseller carousel with prices (the live homepage shows the range strip and concern cards instead)
- Assessment area cards with stats, the "Find a certified physio" button, and the "Keep learning" latest-articles block

Typos kept exactly as live (fix at source if you want)

- "Teck Neck" (Cervical Neck Pain & Teck Neck… Roll-On) and "Repititive" (Wrist Support…) are product titles from Shopify; fix them in Shopify and they update everywhere
- "physio-therapist" in step 3 of "clinically accountable"
- "See all usecase" (vs "See all use cases")

Follow-ups outside the homepage

- The live site advertises an RSS feed at /feed/; the new site has none, so that URL will 404 after launch unless it's redirected
- Re-run `node scripts/scrape-home.mjs` before launch if the live homepage changes, then rebuild
